Summary :

I'm a computer science graduate. I'm passionate about designs and creating stunning designs. I always learn new things and develop my skills in order for me to be able to compete with the best people. I love competition and the spirit of competition that's why I have to develop my skills and work even harder to achieve that.

Education :

I graduated with B.S Degree from Thebes academy year 2019
GPA 2.5 / 4.

Experience :

Sept. 2021 - Present Ejjadh, Front-end Engineer

- at Ejjadh I was working with a team to design and develop web application.
- I was responsible for develop the UI and manage the state and all async Effects , connecting to Back-end Endpoints and also to maintain old application.
- Tech used : Reactjs , nextjs , Redux , Saga ,

Mar. 2019 - Aug. 2019 Ajwal, Freelancer

- Ajwal is a B2B travel booking portal that connects with third party APIs which include onlinebooking capabilities (hotels - flights - trains).
- I was responsible for processing the static data (Handle JSON response).
- Tech used : Python

Projects :

April 2022. EjjadhMarket (E-commerce)

- I was responsible to Develop and connect the Ui to back-end`s Endpoints and manage state and (every thing that related to the UI).
- EjjadhMarket was a challenge for me, Because I was introduced to a new Concepts like SSG, SSR, and how to manage the statue with next-redux-wrapper due to incapability between next and redux at the server-side or static props method of accessing the redux store so next-redux-wrapper was a must to approach the what I need..
- I was also responsible to develop a dashboard to manage the store content.
- tech used : Nextjs as FrameWork - Redux for statemanagement - Redux-saga to manage Async Effects - Sass for styling.
- Link : [EjjadhMarket](#)

I have done alot with ejjadh but considring the time of the reader i will only mention what i think for me it worth to mention.

(note : please use A MENA VPN to access the website due to the company polickey they block othe countries outside the MENA).

May. 2021 - Present. Spell Tracker app

- Spell Tracker is a game overlay that helps the player to gather more information to make his/her next decision.
- I was responsible for everything.
- Tech used : Typescripts, API integration, SASS.
- link : [Spell Tracker](#)

Jun 2021. Where in the world?

- Where in the world? is the website to help users to know more about a world's countries.
- I was responsible for everything.
- this project I add because I designed a simple routing at it and really helped me learn more about the routing process.
- Tech used: VanillaJs, API integration, SASS.
- link: [Where in the world?](#)

Jul 2021. Waves

- Waves is a Media Player.
- I was responsible for everything.
- Tech used: reactjs, SASS.
- link: [Waves](#)

As Front-End Dev, I have Knowledge at :

- React Js&Ts.
- Typescript.
- Redux (stateMagment)
- SASS.
- Javascript.
- HTML&CSS.
- Git & Ajax & JSON.
